

#### IN THE SUBSTITUTE SPECIFICATION

Please cancel the entire Substitute Specification of the application, as filed as an accompaniment to the Preliminary Amendment filed April 9, 2002. Please replace the cancelled substitute specification with the accompanying Second Substitute Specification. As will be discussed in the Remarks portion of this Amendment, the Second Substitute Specification is the result of a detailed review of the Substitute Specification, as requested by the Examiner, and the rectification of various minor errors in numbering and non-uniformity in terminology. Because of the substantive number of these minor changes that have been made, the presentation of the Second Substitute Specification is believed to be the most expedient way of accomplishing these changes. None of these changes constitutes any new matter. A marked-up copy of the Substitute Specification, which shows the changes made thereto, to arrive at the Second Substitute Specification, is submitted for the Examiner's consideration.
